Our Buildings

Some of the standard features:

- ▶ Constructed from quality 16mm shiplap weatherboard cladding.
- ▶ The same quality cladding is used on both the roof and floors of our buildings.
- ▶ Heavy-duty green mineral felted roof.
- ▶ Quality timber bearers come ready attached to floors on all models.
- ▶ Supplied with a free factory base coat timber treatment.
- ▶ 3mm horticultural glass is fitted in all windows as standard. (Children's playhouses are fitted with safety glass)

Sheds

Standard Apex

Traditional style garden shed. Door can be sited on either end and windows can be positioned on either side. The Apex shed has a high internal roofline for storing those taller items.

Standard Pent

The Pent shed features an offset single door. A choice of four other door positions are also available, so making this model a very versatile building.

Workshop

Taller than average - having a 73" eave height. This strongly built workshop has 1 1/2 doors for ease of access. It provides secure storage and extra high internal working space for the home craftsman or professional.

Potting Shed

This multi purpose shed is designed for maximum use of natural light. It comes with a full-length internal bench mounted under the window. It is also supplied with a stable door fitted as standard.

Tool Tidy

The tool tidy is strongly built and normally supplied without a window for added security. It will accommodate most lawn mowers and a host of garden tools.

Summerhouses & Playhouses

These buildings are designed to add style and elegance to your garden.

Hamlet Summerhouse

The Hamlet summerhouse comes complete with Georgian style windows, together with double doors that are fitted with decorative antique style black handles, hinges, lock and keys. This model shows an optional veranda. Roof overhang and opening side windows are fitted as standard.

Corner Summerhouse

This five-sided building has been designed to suit any corner of the garden. Supplied with Georgian style opening windows, together with double doors that are fitted with decorative antique style black handles, hinges lock and keys. The roof is a rearward sloping single pitch that adds to its neat and stylish appearance.

Arran Summerhouse

The Arran summerhouse has a fully glazed Georgian front elevation to allow in maximum light. Its centrally positioned double doors allow easy access. The doors and windows have antique ornate black furniture fitted as standard, with matching brackets supporting the wooden tiled canopy, which frames this summerhouse perfectly.

Childs Luxury Playhouse

An impressive two storey detached playhouse. This model has a stable door. Inside is a staircase and upper landing area. The playhouse has safety glazed Georgian windows and safety door fittings supplied as standard. The window boxes and decorative shutters (shown) are also included as standard.

Childs Cottage

Designed for the smaller garden where space is at a premium. The cottage has safety glazed windows and safety door fittings as standard.

Special Order Buildings

- ▶ We offer a free home visit / site survey to ensure that you are purchasing the correct building for your requirements.
- ▶ All buildings can be supplied with a choice of accessories, making it a totally bespoke service.

- ▶ Whether you want a standard size garden building or you have an awkward plot size, we will try and accommodate your requirements.
- ▶ We offer a Log-Lap effect finish for an additional charge (as seen in the pictures).
- ▶ We can design a building for a particular use - perhaps a log store and summerhouse as seen in the picture of our Multi-use store.
- ▶ An Apex shed with a particular style of window and door – even double glazed units can be supplied.
- ▶ A very large Pent storage shed with double doors and a heavy-duty frame which can be supplied for added strength.

Garden Gazebos & Smoking Shelters

These low maintenance tanalised buildings are attractive, safe and robust. They are built with heavy-duty framing and have interchangeable side panels. Having the option to add a bar feature and choice of finishes, making this a totally bespoke building.

Animal Housing

Blythe Kennel and Run

A heavy duty pent roofed kennel and run. Made using 2" x 2" framing, the extra height at the front of the kennel enables you to stand up inside. The run has fully galvanised chew proof wire mesh. The building is made from quality 16mm shiplap weatherboard cladding and has a floor included as standard. There are separate doors to both the kennel and run area.

Avon Kennel and Run

This kennel and run has a lower roof height for the smaller and medium sized dog, but still has the strength with 2" x 2" framing also being used. It has a galvanised wire mesh panel and separate doors to the kennel and run areas.

Dog Hut

This is constructed from 16mm quality shiplap weatherboard cladding and 2" x 1 1/2" framing with a green mineral felted roof. It will suit most dogs.

Chicken Hut

The chicken hut has side nesting boxes and internal tiered perches. Sides are detachable and can be unbolted for cleaning purposes. It is built on bearers to protect against cold and damp. There is a liftable lid over the nesting boxes for easy removal of eggs and ease of cleaning. It is also predator proof and is constructed from 16mm quality shiplap weatherboard cladding.

Bird Aviary

This aviary is a special design order with a wooden shingle effect roof and octagonal main flight area. The bird room is made using quality 16mm shiplap weatherboard cladding and has a green mineral felted pent roof. It has a sliding access hatch for birds to enter the flight area.

Field Shelters, Mobile Stabling and Traditional Stabling

All models come with the following features as standard:

- ▶ Canopy has a 3.5ft (1050mm) lined overhang
- ▶ 12mm kickboards as standard to 4ft (1200mm)
- ▶ Onduline roofing sheets with roof lights as standard
- ▶ Guttering to front of building
- ▶ 3" x 2" stress graded frame work
- ▶ 4" x 2" roof bearers
- ▶ Shiplap pressure treated 19mm x 125mm cladding
- ▶ Fully furnished galvanised fittings on stable doors including chew strips

Our field shelters and mobile stables are supplied with 100mm steel box security skids, which are hammerite painted and can be moved using two towing rings at each end.

All timber used in the construction is pressure treated. The Onduline roofing is not only waterproof but also resistant to rot and fungi.

Our range of buildings are offered in standard sizes, but should you wish an alternative size or design, a bespoke service is available..

Information

Timber - Wood is a natural product and prone to changes in appearance, including some warping and splitting particularly in extreme temperature. This is natural and is not covered by the guarantee.

Treatment - All sections of the buildings are dipped during manufacture in a factory basecoat timber treatment. To maintain appearance and quality, we would recommend that a topcoat timber treatment should be applied as soon as practical after assembly and thereafter annually.

Floor - To prevent rotting, floor joists are required to remain open to allow for the air to circulate below the floor

Hardware - Black japanned, galvanised or an antique finish, dependant on building.

Glass - 3mm horticultural glass is fitted to all windows as standard (except children's buildings where a safety substitute is provided)

Base - All base work would be the responsibility of the customer. Please ensure that the base for your new garden building is firm, level and square.
